

Ambitious About Autism
Risk Assessment – Coronavirus (2019-NCov)
Risk Assessment – The Rise School Sixth Form

Definitions

“AaA” means Ambitious About Autism and Ambitious About Autism Schools Trust.

Clarifications

The purpose of this Risk Assessment is to outline risks associated with the COVID-19 pandemic, as well as the actions AaA is taking to manage these risks, specifically for The Rise School. This particular risk assessment is to cover a specific AaA setting and is intended to cover any person entering that setting, regardless of whether they are a pupil, parent or guardian, member of staff, volunteer, partner, visitor or contractor.

Separate, more specific risk assessments have been drawn up for specific groups of staff, as well as pupils and learners. This risk assessment is different in the sense that it is intended to cover the access to and generally understood activities within particular setting or location.

AaA recognizes that some staff are classified as per the government guidance as being particularly vulnerable. Where appropriate and in accordance with government guidance, separate, individual risk assessment and subsequent adjustments will be made for these staff.

THIS RISK ASSESMENT MUST BE READ IN CONJUNCTION WITH THE GENERIC “SCHOOL AND COLLEGE STAFF” RISK ASSESMENT
(*Please see footnote on final page of this document)

THIS RISK ASSESMENT IS REVIEWED MONTHLY, AND WILL THEREFORE CAPTURE ANY ADDITIONAL CONTROL MEASURES DEEMED NECESSARY AS THEY
ARISE.

Title:	Coronavirus (2019-NCov) Risk Assessment	Page:	Page 1 of 10
Issue Date:	20 May 2020	Review Date:	05/04/2021

1.0 Background

A coronavirus is a type of virus. As a group, coronaviruses are common across the world. Typical symptoms of coronavirus may include a fever and a cough that may progress to a severe pneumonia causing shortness of breath and breathing difficulties. The UK government is updating the official symptoms periodically, as more is learned about the disease.

Generally, coronavirus can cause more severe symptoms in people with weakened immune systems, older people, and those with long-term conditions like diabetes, cancer, and chronic lung disease. Novel coronavirus (2019-nCov) is a new strain of coronavirus first identified in Wuhan City, China.

Viruses constantly change through mutation, and so the emergence of new variants is an expected occurrence and not in itself a cause for concern; SARS-CoV-2 is no exception. A diversification of SARS-CoV-2 due to evolution and adaptation processes has been observed globally.

While most emerging mutations will not have a significant impact on the spread of the virus, some mutations or combinations of mutations may provide the virus with a selective advantage, such as increased transmissibility or the ability to evade the host immune response. In such cases, these variants could increase the risk to human health and are considered to be variants of concern. AaA will continue to monitor and react to all new variants of the coronavirus and implement specific controls measures where necessary.

In mid-September of this year, epidemiologists identified new coronavirus variants (or strains) that was markedly different from all the others. The Kent & South African strains have appeared throughout the U.K. By December, British health officials were concerned by how quickly it had spread, and a series of stringent lockdown and travel bans were put into effect. These lockdown measures (tier 4) effect all the venues with AaA.

A vaccination programme for all staff was introduced in February 2021, all front line staff will be given the opportunity to have the first COVID vaccination by the end of FEB 21. In January 2021 all AaA Schools & Colleges have introduced twice weekly lateral flow testing of staff & some pupils. A separate risk assessment is in place to cover this activity. All Pupil & Learners return to School/Colleges from 8th March and COVID19 Home testing will start in line with Government guidance from week beginning 8th March 2021. A separate risk assessment is in place and covers this new hazard.

Issue Date:	20 May 2020	Review Date:	05/04/2021

Development of symptoms or contracting COVID19.	Risk of infecting colleagues / pupils / learners with COVID19.	Staff, Pupils, visitors	<ol style="list-style-type: none"> 1) If anyone exhibits symptoms, they are to alert the SLT immediately and be taken to the COVID19 Assessment room. 2) If a pupil, or staff member develops symptoms compatible with coronavirus, they should be sent home and advised to self-isolate for 10 days. Their fellow household members should self-isolate for 10 days. All staff and pupils who are attending an education setting will have access to a test if they display symptoms of coronavirus and are encouraged to get tested in this scenario. 3) Guidance and procedures in place within AaA for staff to manage the onset of suspected symptoms, or indeed contracting COVID19. https://ambitiousaboutautism.sharepoint.com/sites/CoronaVirus/ 4) School must follow the COVID-19: cleaning of non-healthcare settings guidance. Where the pupil, or staff member tests negative, they can return to the school and the fellow household members can end their self-isolation. Where the pupil, or staff member tests positive, the rest of their class or group should be sent home and advised to self-isolate for 14 days. The other household members of that wider class or group do not need to self-isolate unless the pupil, or staff member they live with in that group subsequently develops symptoms. <p>As part of the national test and trace program, if other cases are detected within the cohort or in the wider setting, Public Health England’s local health protection teams will conduct a rapid investigation and will advise the school and other settings on the most appropriate action to take. In some cases, a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure – perhaps the whole class, site, or year group. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.</p>
Development of negative mental health symptoms			PLEASE REFER TO THE GENERIC “SCHOOL AND COLLEGE STAFF” RISK ASSESMENT
Staff may have questions around COVID-19 or AaA Management or			PLEASE REFER TO THE GENERIC “SCHOOL AND COLLEGE STAFF” RISK ASSESMENT
